

REFERENCE

Gautam Buddha University, Greater Noida, India

Application Field

- Façade Protection

Structure Type

- Schools/Universities

Brief description

Gautam Buddha University, established by the UP Act (9) of 2002, commenced its first academic session at its 511 acres lush green campus at Greater Noida in August 2008. The University is funded by the New Okhla Industrial Development Authority (NOIDA) and the Greater Noida Industrial Development Authority (GNOIDA). The University encourages multidimensional growth through its education and training. The emphasis is laid on inculcating a sense of responsibility in the young minds and inspiring them to harness these skills for developing a dynamic, dependable, and entrepreneurial model for sustainable growth of the society. A tireless quest for knowledge, exploration, and intellectual excellence make us distinct from the rest.

Scope of Work

The façade protection work was carried out by Remmers India. Remmers Funcosil SNL was used for water repellent treatment. The stone used on the façade was treated with Remmers Historic Scumble mixed in Remmers Funcosil WS to impart uniformity in stone shade.
