

REFERENCE

IIT to NH8 Flyovers, New Delhi, India

Application Field

- Anticarbonation Coating

Structure Type

- Flyovers

Brief description

The 3 flyovers connecting IIT gate to NH-8 have been built in record time for the XIX Common Wealth Games 2010. These flyovers were an initiative of the PWD taking into consideration the heavy traffic situation during the CWG 2010 and for smooth functioning and movement of traffic in Delhi.

Scope of Work

The flyovers were coated by Remmers Hydrodeep Primer and Remmers Concrete Acrylic for imparting anticarbonation properties to the concrete surface and protecting the surface from pollution, rain and other adverse environmental conditions.

Client
